

Abstract

Education Programme: Healthy Kids

-Multiprofessional Cooperation on Prevention of Overweight in Childhood and Adolescence

Maria Kasanen, Seinäjoki University of Applied Sciences

Healthy Kids – Education Programme has planned and implemented in Seinäjoki University of Applied Sciences. Modelling project of The Overcoming Obesity Programme in Seinäjoki is on the background of the Education Programme. Pilot of the Education Programme has planned in close association with the representatives of the City of Seinäjoki and we offered the Education Programme first to the employees of municipalities whom are in the project of modelling.

Healthy Kids – Education Programme has planned for supporting the participants' professional development to promote health and wellbeing of children and adolescence by utilizing multiprofessional cooperation in health and wellbeing management in all operations and practices in organizations.

The Education Programme has started January 2018 and You will hear more about aims, contents and implementation of the Education Programme in presentation. We will develop the Education Programme in Seinäjoki University of Applied Sciences and offer it in English too.
